### **DETAILED ACTION**

1. Applicant's arguments, see remarks pages 9-13, filed May 12, 2004, with respect to claims 1-6, 8, 11-13, 15, and 18-28 have been fully considered and are persuasive. The rejection of claims 1-6, 8, 11-13, 15, and 18-28 has been withdrawn.
2. The following is an examiner's statement of reasons for allowance: As pointed out by the Applicant the claimed invention at hand acquires contrast MR images by using readout gradient that is parallel to the direction of an object's movement. This is distinctly different from Margosian et al (US 5,423,315) where the gradient readouts are perpendicular to the direction of the object's movement. Moreover, Pelc et al (US 6,445,181 and US 4,663,591) and Steckner (US 5,865,747) similarly uses perpendicular or orthogonal readout gradient to compensate for the motion. In addition, none of the above renders obviousness to one skilled in the art to modify the directional gradient readout to require parallel with respect to the objection's movement. Therefore, claims 1-13 and 15-29 are allowed over prior arts.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
